

BRIDGES

Freeways allow for the free flow of traffic, interrupted only by cars merging at designated interchange points. Before determining how a local road crosses a freeway, engineers must study the vertical grades, the quality and stability of the soil, the right of way lines, the existing natural landscape and the cost estimates.

Below is a listing of how local roads will intersect the New US 31 freeway.

Roads or structures expected to cross over US 31:

- I-465
- 111th Street
- 126th Street
- 131st Street
- Keystone Parkway
- 146th Street
- 161st Street

Roads or structures expected to cross under US 31:

- 106th Street
- 116th Street
- 136th Street
- Monon Trail
- Range Line Road
- Union Street
- 151st Street
- 156th Street
- 169th Street
- SR 32
- 181st Street
- 191st Street
- SR 38

Cul-de-sacs:

- 103rd Street
- Greyhound Court
- Park Street
- Blackburn Avenue
- 196th Street
- 202nd Street
- 203rd Street
